MASTER EAR MUFFS AND EAR PLUGS

EAR-MUFF-IND

EAR-PLUG

EAR MUFFS

Master ear-muffs are robust and lightweight. They provide optimum protection against physical injury, are comfortable and offer a high level of protection against noise damage to ears. Adjustable cups and noise absorbent soft foam ensure a perfect fit. Suitable when machining, grinding, metal cutting and woodworking and activities where noise is generated.

TRI-FLANGE EAR PLUGS

Master tri-flange ear-plugs are designed for easy visibility and manufactured from soft, pliable plastic rubber. While offering a high level of protection against noise, optimum protection and comfort to the ear canal is ensured. Suitable when machining, grinding, metal cutting and woodworking and activities where noise is generated.

FEATURES

- dB rating: 26DB
- EN standard: EN352-2:2002

PU FOAM EAR PLUGS

Master PU foam ear-plugs are designed for easy visibility and manufactured from soft, pliable plastic foam. While offering a high level of protection against noise, optimum protection and comfort to the ear canal is ensured by the expanding foam. Suitable when machining, grinding, metal cutting and woodworking and activities where noise is generated.

FEATURES

- dB rating: 38DB
- EN standard: EN352-2:2020

When fitted properly, dust masks prevent the inhalation of dust in the air and thereby protect the lungs. When inhaling, dust-filled air is pulled through the mask and the dust is captured on the outside layer of the mask. Dust masks not fitted properly, will allow dust-filled air to bypass the mask and enter the respiratory tract. Chemical vapours and toxic substances are not filtered out by dust masks.

FEATURES

- FFP1, FFP2 AND FFP2V
- Moulded construction
- Comfortable fit and breathability
- BFE > 95%
- Suitable for use in many industries such as construction, mining, agriculture etc.

FFP1

The Master FFP1 is the most basic in the mask series and is mostly used to protect against non-toxic substances such as brick dust, cement, limestone and pollen.

FFP2

The Master FFP2 mask prevents the inhalation of material such as particles, dust and aerosol fumes. It is suitable for use in various industries like construction, pharmaceutical, glass, foundry and agriculture.

FFP2V

The Master FFP2V provides respiratory protection against higher levels of fine dust types, mists and metal fumes. An embossed and sculptured top panel provides reduced fogging of eyewear and enhances ease of wear during extended hours of use.

MASTER RESPIRATOR MASK AND CARTRIDGES

SFT403

SINGLE CARTRIDGE RESPIRATOR

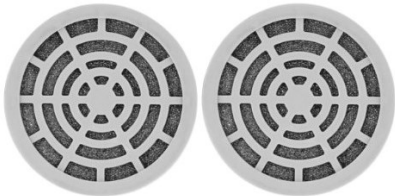

The Master half-mask-single-respirator is reusable, light-weight and adjustable as well as compatible with A1 and P2 cartridges. Its design ensures a perfect fit and seal to the face as well as protection to the respiratory system from hazardous gases and particles. Its exit valve allows easy and efficient exhalation.

SFT404

DOUBLE CARTRIDGE RESPIRATOR

The Master half-mask-double-respirator is reusable, light-weight and adjustable as well as compatible with A1 and P2 cartridges. Its design ensures a perfect fit and seal to the face as well as protection to the respiratory system from hazardous gases and particles. Its exit valve allows easy and efficient exhalation.

SFT405

A1 CARTRIDGE

The Master A1 cartridge clips into half and full face respirator masks. It protects the user against organic and inorganic vapours.

P2 CARTRIDGE

The Master A1 cartridge clips into half and full face respirator masks. It protects the user against dust and small particles.

MASTER CUT-RESISTANCE GLOVE

GLOVE010

CUT-RESISTANT GLOVES

Master Cut Resistant gloves are lightweight, have high mechanical strength with cut level five and PU coating which provides dexterity and grip. They have high tear-resistance properties for protection of the hands against abrasion, cuts and punchier hazards. These gloves are ideally suited for use in industries and risk-exposure areas where toughness and dexterity are required. Applied application areas include engineering, automotive, component assembly and warehousing. Available in sizes eight, nine and ten.

FEATURES

- 13g HPPE cut-fibre liner.
- PU coated smooth Palm finish.
- Level 5 high cut-resistance.

MASTER BARRIER NETTING & TAPE & BUGGY WHIP

SFT540

BARRIER MESH NET

The Taurus Orange barrier fencing mesh is an extruded poly-propylene plastic mesh ideal for cordoning off building sites, construction sites, sporting event areas and for general crowd and pedestrian control. Orange barrier fencing mesh is UV-stabilised and a bright, high-visibility orange colour for maximum warning.

SFT541

BARRIER WOVEN NET

The Master orange and yellow woven barrier net is a highly visible safety mesh net ideal for preventing access to unauthorised areas and also as a visual warning for potential hazard sites. It can be used to cordon off building and construction sites, sporting event areas and in general, for crowd and pedestrian control.

SFT545-100M

BARRIER TAPE

Master barrier tape has a two-tone alternating red-white diagonal stripe pattern. It is used to warn or draw attention to potential hazardous areas or situations. It acts as a minor impediment for accidental entrance to such an area or situation and as such, enhances general safety.

SFT546

BUGGY WHIP

The Buggy Whip is a 3 meter long fibre-glass pole with a lime reflective sleeve with a horizontal reflective strip on an orange flag. It's used to improve visibility on vehicles when working and driving in dark and dusty environments.

TAURUS WELDING GOGGLES

Taurus welding goggles are designed to protect the user's eyes from harmful radiation and other welding and cutting residues and fit snugly to the face. The lenses are replaceable with standard size 108mm x 51mm welding helmet lenses. Suitable for use in areas such as engineering, factories and workshops.

TAURUS AUTO-DARKENING SPECTACLES

TADS001

AUTO-DARKENING SPECTACLES

Taurus auto-darkening spectacles sense arc light from the welding process and electronically activate the liquid crystal filter resulting in darkening of the lens and thereby protecting the operator's eyes from ultraviolet (UV) and infrared (IR) radiation. The spectacles are easy to use, sturdy and durable. Solar cell design obviates battery change.

TADS002

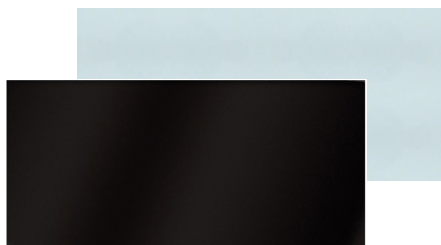

AUTO-DARKENING PROTECTIVE LENS

The protective lens for the Taurus auto-darkening spectacles shields the auto-darkening lens from slag and spark damage.

TAURUS FLIP FRONT WELDING HELMET LENSES

CLO1 & WF-E20051

WELDING LENSES

Taurus welding lenses are made from glass and fit most welding helmets using 108mm X 51mm size lenses.

LENSES AVAILABLE

- CLEAR
- SHADE 08 TO SHADE 12

CML-1.5-PC - CML-2.5-PC

MAGNIFYING LENSES

Taurus magnifying lenses are manufactured from durable, high-impact plastic material with a high resistance to cracking. The lenses are anti-reflective coated, reduce glare, optimise light transmission and facilitate a productive welding session. The magnified image enables the operator to create high-accuracy welds. Magnifying lenses easily fit into most flip-front welding helmets which use 108mm x 51mm size lenses.

TAURUS FLIP FRONT WELDING HELMETS

HSTD03

HSTD004

FLIP FRONT HELMET

Taurus flip-front welding helmets are manufactured from polypropylene and are suitable for MIG, TIG and arc welding. During the welding operation it protects face and eyes from sparks, light and radiation. Shaded lenses are protected by clear glass lenses. Lenses are 108mm X51mm and are easily replaceable.

HSTD01

LEATHER FLIP FRONT HELMET

The Taurus leather flip front helmet is ideally used where places are too small to fit a regular welding helmet. It's made from high-quality cowhide split grain leather which fits securely over the head and neck offering extra protection. The flip front lens holder uses the standard size 108x51 welding lenses and are easily replaceable when required.

TAURUS LY100FS AUTO-DARKENING WELDING HELMET

The Taurus LY100FS auto-darkening helmet protects eyes, face, neck and ears from welding-spatter residue and grinding particles. Of particular value is eye and face protection against ultra-violet (UV) and infrared (IR) radiation. The auto-darkening system is the result of the electronically fixed shade DIN 11. The darkening system is operated by a solar rechargeable Lithium battery. The switching time between arc and darkening is 1/10000s. The fabrication material for the shell has a soft, semi-flexible and flame-retardant texture with high strength and durability. The Taurus helmet's design is based on an international ergonomic style with ample air space for cooler wear and comfortable fit.

SOME KEY FEATURES

- Solar & battery powered.
- Full face protection.
- Non-Adjustable shade 11

APPROVALS

- CE approved.

- TRUVISION SOLAR AUTO DARKENING LCD FILTER
- FLIP-UP LARGE GRINDING VIEW
- SUPERIOR LENS TECHNOLOGY
- HIGH IMPACT RESISTANCE
- PIVOT HEADGEAR
- SIDE WINDOW
- DIGITAL CONTROL WITH LCD DISPLAY

The Taurus Premium Pro Auto-Darkening Helmet has the same quality specifications as the Taurus LY800P auto-darkening helmet. However, the variable shade-change, sensitivity, delay time and grinding mode are digitally controlled. It is also equipped with TruVision technology which allows the welder to see the weld pool as well as the increased colour spectrum more clearly. The pivot-head gear has four adjustable positions for stability, desired tightness, eye distance from the lens and forward tilt. The visor-up position offers an extended view for grinding operations.

TAURUS SKULL CAPS & LEATHER WELDING HOOD

SCAPS

SKULL CAP

The Taurus skull cap is designed to protect the user’s head and rear neck from hazards such as hot metal splatter contact during welding applications.

- Acid resistant
- Flame retardant

SFT231

LEATHER WELDING HOOD

The Taurus leather welding hood is fabricated from grain-split leather and is worn under the welding helmet. It protects the user’s head, complete neck an shoulders against hazards such as hot metal and slag generated from welding, grinding or cutting.

FEATURES

- Smooth premium thick leather.
- Kevlar stitching.

TAURUS TIG GLOVES

SFT041

BUFFALO LEATHER TIG GLOVES

Taurus TIG gloves are fabricated from full-grain buffalo skin leather specially designed for TIG welding. Softness, suppleness and durability of goatskin ensure excellent fingertip sensitivity for precision welding. The Taurus pro TIG fingertip gloves come with thick premium quality leather and Kevlar stitching.

AVAILABLE IN THE FOLLOWING LENGTHS

- Wrist (50mm)
- Elbow (200mm)

SFT051

PIG SKIN TIG GLOVES

Taurus TIG gloves are fabricated from pighide leather also specially designed for TIG welding. It allows good fingertip sensitivity for precision welding.

TAURUS CANDY STRIPE GLOVES

SFT070

CANDY STRIPE COWHIDE GLOVES

Taurus candy-stripe gloves are fabricated from split-grain cowskin leather and designed for general rigging and handling operations.

SFT071

CANDY STRIPE PIGSKIN GLOVES

Taurus candy-stripe gloves fabricated from split-grain pighide leather are designed for rigging and general handling operations requiring abrasion resistance. The porous structure of pighide facilitates skin breathing.

SFT072

CANDY STRIPE VIP RIGGER GLOVES

Taurus VIP rigger gloves are fabricated from premium, green-dyed split-grain cowhide leather. This product is designed for rigging and general handling operations where high abrasion resistance is required and where injurious handling possibilities are present.

FEATURES

- Smooth premium thick leather.

TAURUS LEATHER WELDING GLOVES

SFT020

BLUE LEATHER GLOVES

Taurus blue-yellow gloves are fabricated from A-grade dyed split-grain cowhide leather. Reinforced-leather palms ensure abrasive resistance and soft cotton-fleeced inner linings also reduce heat transfer. The seams are sewn with high heat-resistant Kevlar thread for added strength. This product is exceptionally well suited for hand protection during welding operations.

FEATURES

- Smooth premium thick leather.
- Kevlar stitching.
- Reinforced palm.

SFT031

HEAT GLOVES

Taurus leather heat gloves are fabricated from premium grade, red-dyed split-grain cowhide leather with an apron palm for added heat protection. Cotton-fleeced inner linings offer additional thermal protection. The seams are sewn with high heat-resistant Kevlar thread for added strength. This product is exceptionally well suited for hand protection during welding operations.

TAURUS LEATHER YOKES

SFT150 → SFT154

CHROME LEATHER YOKE

Taurus chrome-coloured yokes are fabricated from split-grain cowhide leather and protect upper body, arms and clothing against hot metal, slag and metal fragments generated from welding, grinding and cutting operations. Available in sizes from large to five-extra-large.

FEATURES

- Smooth premium thick leather.
- Kevlar stitching.

PREMIUM GOLD YOKE

Taurus gold coloured yokes are fabricated from premium split-grain cowhide leather and protect upper body, arms and clothing against hot metal, slag and metal fragments generated from welding, grinding and cutting operations.

SFT160

ANKLE SPATS

Taurus chrome-coloured leather ankle spats are fabricated from split-grain cowhide leather and cover shoes or boots and socks. Spats act as protectors of shoes, socks and ankles against hot metal, slag and metal fragments generated from welding, grinding and cutting operations.

FEATURES

- Kevlar stitching.
