

POWER-CUT

PLASMA TORCH AND ACCESSORIES

INDEX

Powercut is in no way affiliated with any of the manufacturers referred to in this documentation. The parts mentioned are not genuine parts but instead are manufactured with high-quality copper and material for Power-Cut. The use of the original manufacturers' part numbers registered, and unregistered trademark are for convenience only.

The Powercut PT31 is an industrial standard, hand-held plasma cutting torch. At a 60% duty cycle it is rated at 40A. The torch is light-weight, easy to use and its cutting capacity is up to 12mm on mild steel. The Powercut PT31 and its consumables are designed economically and presented as a quality product with an affordable price tag.

The Powercut AG60, also known as a P60, is a 60A plasma cutting torch used for drag cutting. It is versatile and widely used for various cutting applications in the engineering, automobile and chemical machinery industries. The torch is light-weight with a comfortable grip and is easy to use. At 60% duty cycle it is rated at 60 A and can cut mild steel up to 22mm thick. Its cutting capacity includes various metal types including mild steel, high-carbon steel, stainless steel, aluminium, copper and other non-ferrous metals.

RETAINING CAP

GUIDE

The Powercut P80 is an 80A plasma cutting torch used for drag cutting. The torch head is manufactured from high-quality material with good flame retardation. It is versatile and widely used for various cutting applications in the engineering, automobile and chemical machinery industries. It is characterised by high cutting speed, precision performance and small thermal deformation. It is ergonomically designed which makes extended-time handling easier and less fatiguable. At 60% duty cycle it is rated at 80A and can cut mild steel up to 35mm thick. Its cutting capacity includes various metal types including mild steel (flame cutting), high-carbon steel, stainless steel, aluminium, copper and other non-ferrous metals.

SHIELD

POWERCUT HT COOLANT

The Powercut torch coolant is a cooling agent applied to the plasma cutting process. It circulates around the electrode and nozzle, reduces wear and tear, extends lifespan of accessories and consequently saves on consumable costs.
